

Destin8 Transaction: **VGM**

Verified Gross Mass

To accommodate the amendment to SOLAS VI Regulation 2, we have introduced a new onscreen transaction. This enables third parties to update laden export bookings with Verified Gross Mass (VGM) information, via Destin8. Together with other provisions made to facilitate VGM, we also accept the inbound VERMAS EDIFACT Message.

You can access the VGM transaction using the dropdown menu on the left hand side of the Destin8 Screen, selecting 'Exports' then 'Booking'. Alternatively you can enter 'VGM' in the transaction code box on the sidebar.

VGM01 – Entry Screen: Here you enter either the UCN, Unit ID or Booking Reference to identify which export booking you wish to update with VGM information.

Verified Gross Mass

UCN:

Unit ID: UVI:

Booking Ref: UVI:

If the Unit Id or Booking Reference is not unique and therefore appears on multiple records then you must supply the UVI (Unique Voyage Identifier) to proceed to the correct booking.

Please note that the Cargo Broker who made the export booking must allow third party updates in order for you to be able to update the VGM details on Destin8 against their booking. The Export booking (Pre-Exec) must also exist on the system before you can continue onto the update screen (VGM02).

VGM02 – Verified Gross Mass Details:

Verified Gross Mass Details			
UCN:	77907 0001	Vessel Name:	MOL Quest
Berth:	TTY - Trinity Terminal	Working Port:	GBFXT - Felixstowe
Estimated Departure:	09/06/2016 12:00	Cargo Broker:	HLG - Hapag-Lloyd UK Ltd Import
Unit ID:	CPSU1014669	Booking Ref:	42129162-0001
Packages:	5	Description:	parts
Tare Weight:	3000	Nett Weight:	9345

Status updates:

Verified Gross Mass:

Authorised Person:

Weigh Method:

Weigh Date & Time:

Responsible Party:

VGM Reference:

Charge Company:

P.O. Number:

Terminal Weigh:

*****If no VGM has been entered above and no "Terminal Weigh" request made, the Terminal Operator will automatically be notified that a VGM (SL) will be submitted prior to the VGM cut off window*****

Real-time status updates can be set (see Pg.3)

If you have the means to supply the VGM you can update the weight in the 'Verified Gross Mass' field. You will, by default, be made the Charge Party and a PO number must be input. The other data fields are optional but any information input will be placed against the booking and sent out in corresponding outputs to the relevant parties. Information supplied will be archived and retrievable for your records.

If you wish to instruct the Terminal to weigh the consignment on your behalf, tick the circled tickbox. You are, by default made the Charge Party and you must enter a PO Number.

***VGM02 - End

```

If you request the Terminal to weigh the consignment on your behalf you can be set to receive the VGM02 Output notification.

This will automatically be sent to you each time an export is updated with a VGM by the terminal and you are assigned as the Chargeable Party. This is in addition to the DMS status update notifications and is a VGM specific output.

In addition to the on-screen VGM transaction, Destin8 can receive the EDIFACT VERMAS Message. This is another method of updating a booking with the VGM weight via EDI.

If you would like to talk through this option further, please contact the Destin8 Helpdesk.

Show All VGM Updates			

Within the Verified Gross Mass section there is a dropdown option to view any sequence of updates that took place. All of this information is obtainable, once purged from the system, in transaction PNQ – Purge Enquiry.

The Export enquiry screen has intelligent filtering options to tailor the results you wish to be displayed, if your search criteria results in multiple bookings. A new filter has been added to the enquiry screen to enable you to filter those bookings that do not have a VGM weight on the booking.

UCN	Unit ID	B/R	L/E	C/B	POD	Description	Pkgs	Status	Declaration	PtoP	L/A	VGM
224540181	MRKU2157693	951961616/EMV	L	KKK	SGSIN	VEHICLES, CARS, BUSES, TRUCKS, LORRIES,	1	Not Arrived		No	No	No

224540344	ARKN0122256	KNIG00015015015...	L	KKK	SGSIN	Plutonium Rods	12345	Not Arrived	UCR 6GB12313216...	No	No	No

You can generate a CSV file containing all of the data from the Enquiry screen. This includes all VGM information on the booking, which can be filtered further in Excel.

TRX - Tracker with Destin8 Messaging Service (DMS):

A quick and easy way to obtain a snapshot status on any manifested booked consignment on Destin8. The DMS – Destin8 Messaging Service incorporated within VGM is also built within this Tracking screen and works on the same basis. The only difference is that you can search for consignments that you are not yet associated to. This is because the information returned is only a status summary, for example is it booked back to the Terminal and has it Arrived?

Tracking Record for Booking Reference: 1
