Welcome

Thank you for requesting information on the Destin8 Port Community System. This information pack aims to provide you with outline information needed to apply for a connection to Destin8 and as such it hopefully covers all aspects of a Destin8 connection from communication, charges involved and technical information in sufficient detail.

However, if there is anything that we have not covered, then please do not hesitate to contact us either on the telephone on 01394 600205 or via e-mail to help@destin8.co.uk.

Meanwhile we hope this Information Pack is of use to you and look forward to hearing from you soon.

What is Destin8?

Destin8 is a Port Community System which enables all sections of the Maritime Industry to facilitate the movement of cargo through a Destin8 enabled port. A typical import container would be manifested by the Shipping Line, the Forwarding Agent would nominate the container for clearance and submit the entry to CHIEF, the Port would arrive the vessel and discharge the container, CHIEF would return the routing for the entry and send clearance if and when applicable, the Shipping Line would release the container to the nominated Haulier who would then update the container with Vehicle or PIN details. The Port will then outgate the container assuming the driver has supplied the correct Vehicle/PIN details. Whilst all this is happening Government agencies like Local Customs, Port Health, DEFRA etc. may require the container for checks with any holds or releases being notified to the applicable parties. All involved parties can use the Destin8 enquiry functions to view cargo information in real time. This includes checking the Vessel eta/ata, Cargo Landed/Loaded status, Customs Clearance status, Outgated/Ingated status and much more. All Destin8 companies have a 3 letter badge or company code which identifies them on the system and is used to ensure that cargo can only be created, updated and viewed by an authorised badge holder.

How can I access Destin8?

Access to Destin8 is via a standard Web Browser such as Internet Explorer and the preferred connection option is through your own company's ADSL line (static IP). There are other options available ranging from ISDN lines to fixed data circuits and ultimately it will be down to you to decide which method of connection best suits the needs of your business. An explanation of each connection method can be found in the Budgetary Section of this pack.

Where is Destin8 used?

Destin8 is currently available for use at the following ports (which includes any ERTS or ICD's registered for that port) – Aberdeen, Bristol, Chatham, Coatbridge (Glasgow), Felixstowe, Grangemouth, Greenock, Harwich, Hull, Immingham, Ipswich, Liverpool, Sheerness, Teesport, Thamesport, Tilbury (31, 40, 43, 45 berths) and Tyne & Blythe. Each full inventory badge costs £1050.00 subscription per year with a reduced rate for Forwarders and Hauliers at Tilbury which is £350.00 per year. The subscription costs in the Schedule of Charges relate to your badge code and are on a per port basis. We also provide non-inventory based services such as Destin8 Exporter and ICS for export (NES) and Entry Summary Declarations (ENS) and charges related to these services are also listed within the Destin8 Schedule of Charges.

Destin8 interface options

Destin8 can further be enhanced with the use of the system's messaging functionality which includes the international message format of EDIFACT and our message format called Visual ISL. This messaging functionality allows inward and outward messages to be sent and received which in turn can be used by your own in-house system. This can negate the need for duplicating work and greatly improve the speed and efficiency of your day to day operations. Please contact us for further information if required.

Finally, if you are a Freight Forwarder you may also require Customs Clearance software to assist with entries. We would recommend you visit the Association of Freight Software Suppliers website at www.afss.org.uk. All the major software houses that link into our system are members of the organisation. Please note however that Destin8 also provides a direct link into the CHIEF system so additional software is not mandatory but may be beneficial depending on entry volumes.

Destin8 Connection Options

Option 1 – Destin8 on the Internet – Includes CHIEF EDI functionality	Capital	Quarterly	Monthly

This is direct internet access to our Destin8 website and is based on your company's ability to establish a reliable and consistent access to the internet via your chosen internet service provider (ISP). You should ensure that you are using an ADSL connection with a minimum speed of 512kbs. You will be required to supply us with a Static IP address of your internet connection for our Firewall configuration. *You will need to select this option if you intend to use customs clearance software or any other automated interface such as EDIFACT messages or ISL.* For further technical information please see the Technical Information section.

Option 2 – Destin8 Browser Access – no CHIEF EDI functionality	Capital	Quarterly	Monthly
Destin8 Joining Fee	0.00	-	-
Destin8 Subscription Per Port Community	-	262.50	-
Standard Destin8 TCPIP Connection	156.20	-	-
Training – if required	250.00	-	-
TCPIP Communications Charge	-	46.86	-
Corporate WAN access (per office)		46.86	
UCN Processing Fees as per current Schedule Of Charges	-	-	Dependent on usage

This method of access has been provided for customers who do not have or require EDI facilities for entry processing. Primarily, it is aimed at low volume users who want to make their electronic declaration to CHIEF via the HCI interface or hauliers for release and/or release amendments of unitised cargo. The only requirement in terms of equipment is an internet enabled PC or laptop and e-mail facilities as all available printed output is delivered as an e-mail attachment. For further technical information please see the Technical Information section.

Regardless of connection method, the Destin8 subscription fee covers the use of the system at one Destin8 port community. This fee also includes your first user id. If further concurrent accesses are required the first is charged at £187.50 per quarter; with each and every one thereafter being £125.00 per quarter. If you wish to connect to more than one Destin8 community, then there will be an additional quarterly subscription of £262.50 for each community. Each full community subscription includes the cost of a user id. For example if you subscribed to Felixstowe, Liverpool and Bristol at 262.50gbp each per quarter you would be entitled to a total of 3 user ids at no extra cost.

Billing is prepaid, one-off for the capital charge, and quarterly in advance for communications and subscription charges. All other associated Destin8 transaction charges are as per our published Schedule of Charges for 2012.

We also offer fixed data circuit connections i.e. an end-to-end kilo stream TCP/IP serial service and a price for this connection type is available on request. Where applicable, the British Telecom charges quoted are exclusive of VAT, which will be charged at the prevailing rate. British Telecom, with whom we will be contracting for the circuit, is currently asking for a one-year commitment such that the minimum initial rental period for a private circuit is one year. If you cease to use the circuit during any subsequent year, you will receive a rebate for the balance of the prepaid rental.

Destin8 Connection Information and Technical Requirements

This information sheet aims to assist new and existing MCP customers to connect to the Destin8 system. Before going into detail it may be worth pointing out that Destin8 is a fully Internet enabled system. It has user friendly mouse and keyboard functions, combined with hierarchical and drop down menus, and is a browser based system that can be accessed via dedicated connections such as fixed data and ISDN circuits, as well as Internet connections although, the latter should ideally be of a broadband type or faster. The following outlines key information that your organisation will need to consider in advance of establishing a connection. The primary aim is to ensure that your connection and interface is compatible with Destin8.

Destin8 Supported Operating Systems:

Windows 2003, Windows XP, Windows Vista and Windows 7 have all been quality assured and are fully supported. Companies operating a terminal server environment are advised to test their interface at an early stage. Although we do not anticipate any issues for either the Microsoft or the Citrix terminal server environment, it has not been possible to quality assure these due to the number of variable configuration options available.

Destin8 Browser Software:

All three major browsers, Internet Explorer version 6 and later, Firefox 3.5 and later and Chrome 7 and later have all been quality assured and are fully supported. Clients should be aware that Java Script must be enabled as a pre-requisite in any browser version used and that pop-ups should be allowed for the Destin8 URLs in your firewall and popup blocker software. It is also recommended that HTTP 1.1 is enabled in the IE Advanced settings to allow for GZip compression. Clients connecting through a proxy server should only enable HTTP 1.1 if their server supports the latter. GZip is embedded in the Destin8 front-end architecture and enables compression of data and as a result decreases bandwidth usage.

In preparation for Destin8 compatibility with Google Chrome and Mozilla Firefox browsers, some changes were made to the Java Script files within the current version of Destin8. In the majority of cases this will have no effect on users or transactions, because the browser and/or proxy settings have the appropriate default option selected. However we are aware that for a few users this is causing an issue due to alternative settings. Affected transactions are those which require the use of a 'tick box' e.g. MCA and RTR/RTE (where bulk updates are requested and appear to have been successful). We recommend that all Customers check to ensure that the newest versions of the stored pages on their browser - for example in IE6, this can be found under Tools, Internet Options, Temporary Internet files, settings - are set to 'every visit to the page'.

Destin8 Network:

All connections to the Destin8 system must be routed via the following unique reference locations (URL):

Destin8 Live Production:

<http://www.destin8.co.uk> (194.201.255.73/32)

Destin8 Live Help:

<http://help.destin8.co.uk> (194.201.255.73/32)

Destin8 Live EDI:

<http://edi.destin8.co.uk> (194.201.255.73/32)

Destin8 Live ISL:

<http://www.destin8.co.uk> (194.201.255.73/32)

Destin8 Test/UAT:

<http://uat.destin8.co.uk> (194.201.255.66/32)

Destin8 Test Help:

<http://uathelp.destin8.co.uk> (194.201.255.66/32)

Destin8 Test EDI:

<http://ediuat.destin8.co.uk> (194.201.255.66/32)

Destin8 Test ISL:

<http://uat.destin8.co.uk> (194.201.255.66/32)

We recommend that DNS entries are modified to reflect these URLs and are resolved to direct this traffic to the relevant connection method/router.

Client owned routers should be configured with ports 20/21 (FTP), 23 (Telnet), 80 (HTTP), 443 (HTTPS) and 515 (LPD) open for both FCPS and Destin8 purposes.

Internet Connections:

All internet connections will need to ensure that the URLs are resolved correctly and connections are routed via the client's own internet connection. A trace route would typically give the following results:

```
C:\> tracert uat.destin8.co.uk Test URL
Tracing route to uat.destin8.co.uk [194.201.255.66] over a maximum of 30 hops
 1) <10 ms <10 ms <10 ms User gateway connection
 2) ditto Depending on the complexity of your internet connection
 3) <30 ms <30 ms <50 ms 158.43.3.234
 4) <30 ms <30 ms <40 ms 62.190.25.83
 5) <30 ms <40 ms <40 ms 194.201.255.66
Trace complete
```

Destin8 IP Addressing Policy:

Please note that a TCP/IP connection will only be established for companies who either operate a registered IP address or are able to accommodate a Destin8 allocated IP address, which will fall in the range of 10.0.0.1 through 10.126.255.254. If you are unable to conform to our IP range, or are concerned about security, we generally advise that either a firewall or a router performing IP address translation be placed between the Destin8 router and your LAN to protect against any possible security violation. It may, therefore, be necessary to provide equipment and software capable of IP address translation. Please be aware that we cannot carry out any destination address translation.

Destin8 Security:

Most clients are hopefully aware of the security risks that are attached to any kind of Internet connection and as a corporate entity, MCP plc recognises that we have a contractual as well as a general duty of care that data is kept secure and, perhaps more importantly, system integrity and optimum availability is adequately protected and maintained. Security in Destin8 is therefore enhanced, particularly for those companies who either wish to maintain, or migrate to, an Internet based connection.

Connection Type	Memorable Information/Security Code	IP Verification/Filtering
Internet access only	Mandatory if no IP verification	Conditional*
Fixed data circuit or ISDN access only	Optional	Optional
Mix of fixed data circuit or ISDN and Internet access	Mandatory for Internet if no IP verification Optional for fixed data or ISDN circuit	Conditional* for Internet Optional for fixed data or ISDN circuit

* Must be a registered or static IP address

The use of memorable information and/or security code is similar in functionality to that in use by financial institutions i.e. a minimum of eight alpha numerical characters where the application randomly asks for three characters to verify the information.

IP verification is based on denial of access for any IP address not previously authenticated and authorised by the static or registered IP address holder where applicable.

Optionally, we also offer enhanced security on Internet based connections such as VPN and FTP these are subject to additional configuration charges and will require an exchange of integral information on our mutual systems.

To configure a VPN access, we will need to mutually agree on:

- A firewall or similar capable of being one end of the VPN a 'site to site' tunnel using IPSEC / IKE encryption schemes. Between us we can then work out a set of parameters which will allow our firewalls and your equipment to work together.
- To translate your IP addresses to fall within a range we allocate (something like 10.100.8.n) before entering the tunnel. This is to avoid any duplicate addresses cropping up. If we use a range you will need to setup a Network Address Translation rule to translate your addresses to this range.
- To confirm your firewall configuration in terms of hardware and software - we operate Checkpoint NGX R71 on a Nokia IP390 with an external address of 62.190.25.81.
- To confirm Firewall encryption settings. Our preferred settings are as follows:
 - Key exchange encryption - 3DES
 - Data integrity - MD5
 - Diffie-Hellman for IKE (Phase 1) - Group 2

- Phase 1 renegotiation - 480 minutes
- Phase 2 renegotiation - 3600 seconds
- Confirm a Pre Shared Secret. We need to decide on a password that we will both use when setting up the VPN.

To configure an FTP connection, we will need to mutually agree on:

- Our IP addresses - you will receive FTP connection requests from us on address 193.129.243.80 Our FTP server (for incoming files from you) is 194.201.255.67, we will also provide you with an account name + password + directory details for you to place incoming FTP files.
- Your IP addresses - for us to FTP files to you we will need the IP address of your FTP server plus an account name + password + directory to put files in.

To avoid file locking, we can send a *.ctl file as which can be processed as part of the standard FTP process or recipients could set an exclusive lock on the incoming file.

Destin8 Input & Output

Prints:

E-mail attachments (SMTP) – this is the preferred option for delivery of printed output and messages from Destin8 across the Internet. All we need from you is an e-mail address to which we can send prints and other output. This can be a single address which you configure with rules within your own corporate system to distribute mail to the appropriate person/department or individual addresses for direct e-mail delivery based on the subject details.

LPD/LPR (Network Printing) – is only supported in Windows 2000, Windows 2003 and Windows XP based hardware solutions or software packages and must conform to RFC1179. In addition, clients accessing via an Internet connection must have a static or registered IP address. All prints will appear to be coming from the following host address: 193.129.243.91/32. Each LPD printer will need to be set up and configured at the user's end. As well as the name of the printer on the client device, we will also need to know the IP address of the LPD client in order to set up a static translation in the MCP gateway router where applicable.

Messaging:

EDIFACT messages – CUSCAR, COPARN, CODECO, COARRI, IFTDGN, COPRAR and COREOR are accepted or transmitted as either e-mail attachments (SMTP) or via an FTP connection.

Inter System Link - (Destin8Visual.ISL) – please note that the Visual.ISL software is only supported when used in the Windows 2003, Windows XP and Windows 7 environment.

Destin8 Support:

Functional and how to use support is provided by our Customer Services Help Desk on 01394 600205 or e-mail to help@destin8.co.uk – our Technical Help Desk on 01394 604915 will provide you with technical assistance on networking issues but we ask you to please bear in mind that they cannot, for security and legal reasons, actively undertake any LAN configuration or internal network tests on your equipment. Our contractual obligations preclude us from carrying out this work and our service provision is only extended to the point of delivery i.e. your company owned network gateway and we strongly advise that your own IT department or a suitable third party should undertake all internal network configurations.
